# Directions Papenstraat 7, Delft

From the A13 to parking garage Markt - Exit 9 Delft

From A13 to Rotterdam or The Hague, take exit Delft. At the end of the exit turn towards Delft. Then at the third traffic light at the end of the road, turn right onto Julianalaan. Drive straight until the next traffic lights where you see the entrance of the Markt parking garage on your left (P Markt, Willem Naghelstraat 1). Turn left at the traffic lights. Here you can park, for a fee. Using the exit "Centrum" you get to the Koepoort Bridge. Cross the bridge and go straight over the Nieuwe Langedijk until you see the Nieuwe Kerk (large church) on your right. Turn right at the Vrouwenregt. Walk straight and turn left at the Voldersgracht. Walk straight on Voldersgracht to the next street to the right. This is the Papenstraat. Turn right into Papenstraat. Jeanne Dekkers Architectuur is located on your left at number 7. (Approx. 9 minutes walk)

Walking route from Delft railway station

From the train station walk towards the city center (see the church towers). Go over the water and the tram lines and turn left onto the Westvest. At the first traffic light turn right into the Binnenwatersloot. With a left-right movement continue along this road over a bridge (you're in the Peperstraat). At the Wijnhaven turn left. When you see the shop Gall & Gall on the corner on the right, turn right over the water and then straight onto the Voldersgracht. Turn left into the Papenstraat. Jeanne Dekkers Architectuur is located on your left at number 7. (Approx. 10 minutes walk)

Please note! There is construction in progress around the station in Delft. The station is accessible but there is an alternative route towards the city center. Take the stairs DOWN to the street (and not the big blue stairs over the tracks). Once arrived at the street, turn right and follow the train tracks till an underpass is visible. Pass under the railway tracks at this point. Cross the street here and go into the city center. (Unfortunately, this can vary by day and change unexpectedly.)
